The committee appointed by Congress to look into the frauds perpetrated by sgents and contractors in furnishing supplies in the present emergency, deserve the thanks of the country for their impartial exposure of a mass of corruption and rascality that is without a parallel in this

The most unblushing scoundrelism was under Fremont in St. Louis, and the testimony implicates Fremont himself. There are two other dignitaries, higher up in the picture than Frement, that ought to place themselves before a court of inquirythe Secretary of the Navy and the Secretary of War. Welles, it seems, appointed his brother-in-law an agent to purchase vessels of war and transports The brother-in-law was not a ship-broker, had no experience in the business, and was not at all qualified for such a business. He was, however, competent to the emoluments of the office. He spread himself widely. He purchased all the Government wanted, or all he wanted, so that his commissions reached in three or four months \$95,000. This was a capital family job. The brother-in-law will divide after such favor voucheafed from high places. If Welles regards his credit as an honest man, he will not rest under such an imputation from a committee. If the facts are as stated, and we presume there can be no question on that point, the Hon.

Already millions have been squandered to subdue the South, and the usurpers at Frankfort are trying to saddle the State with fifty millions of debt this year, and as mnoh more next year. A war with England will double or treble the amount, and will ruin the North and Kentucky with them. If the North should by possibility sneed against the South, Kentucky will then have to fight for her own rights in the Union, but they will by that time render her rnined, degraded, impoverished and utterly helpless. From the London Times, Dec. 14.] Great excitement was caused among the nhabitants of Brixham on Tuseday last, by an American ship putting into their harbor for the purpose of extingnishing a fire which was raging on board. about six or seven weeks since touching at Fushing. On Monday night, about half past 7 o'clook, while about twenty-five miles W. N. W. of Start Point, with a southerly wind, accompanied by rain, the captain's daughter, who was play ing on deck, observed smoke to be issuing from the main hatch. The vessel then ran into Elbury Cove, the intention being to souttle her if the fire could not be got under. While there the coastgnardsm under Lieutenant Milton, repaired to the spet, and, after some time, the vessel sailed into Brixham harbor, and the fireengine, under the direction of Mr. William Brown, the town engineer, was placed on board the harbor commissioners' barge, the Lumprey, and was soon playing on the fire. The holes in the deck were enlarged, and the engines kept playing till about o'clook in the afternoon, when the fire was at length extinguished. The ship's real name ie the Eliphat Greely, built at Bath, and of Portland, Maine, but owing to a fear of privateers, consequent on the recent troubles in America, carries the name of the "Slowman, Hamburg," on her stern. date of Dec. 7, says: She is a comparatively new vessel, having been built only six years ago next February. But great and legit-imate as must be the indignation and disgust excited by such an exhibition as that which our correspondent inform us the Ray. J. Cookesley was the chief actor, last Snnday, at St. Peter's, Mammersmith, we can afford to treat it with contempt, well eatisfied that there will be faw imitators of this gentleman who would evidently be more in his place as a ministrant at the altar of Mars than as a priest of the church of Christ. On the other hand two clergymen, each a representative man in the religious world, have been nobly true to their sacred mission. Last Snnday the Rev. C. H. Spurgeon spoke boldly in reprehension of the war fever which has of late been raging so fiercely; and on Monday evening the Rev. Newman Hali delivered a lecture on the same theme, equally temarkable for the fervor of its elequence and the impregnable forwarded by the same route during the out delay. The grim fiend of war still hovers over us, thirsting to hold hie hideous eaturnalia, and to feast his eyes upon the spectacle of brothers dabbling in each other's blood. There are momente when the curse of his presence must be tolerated as our sole means of preservation from yet greater evils. But we are not now strug are in no grievous peril; our honor needs not for its salvation the baptism of blood. Already there are gladsome tokens of a growing conviction that this is so. The empest lulis, and we welcome the presages of a coming calm. Let the press and the pulpit do their duty, and England and America may be saved from a calamity, the bare possibility of which no thoughtfui man can contemplate without a thrill of

British Consolation for the Rebels

Intermingled with compliments on per-GOVERNMENT HELP:-HEALTH OF GARBARD'S Times has criticisme on several essential tions of Jeff. Davie' meseage, the London points more caustic than consolatory to the rebel ootton growers.

The financial echemes of Mr. Davis are first blown sky high-coming down on this conclusion-"it is simply ridiculous to talk of such a system [paper currency, on security of an eight per cent. stock] as afa fording hope or commanding confidence." Next comes the broadelile against sundry

rebel "grievances," the Times saying: "We read with some impatience the hypocritical lamentations of Mr. Davis, the President of a confederacy which may be said to live and move and have its being under the especial patronage of Judge Lynch, over the violation of personal liborty, the anppression of the freedom of of the press, and the intimidation of the oourte of justice, consequent in the North on the civil war. These things, which the South regards with contemptuous astonishment, the war has not brought upon her, because they were all demesticated with her long before the war. Nor can we sympathise with the lamentations of men who have deliberately lit the torch of oivil war over the cruelties which it has eogendered and children, and the attempt to raise a servile insurrection. These things were for the consideration of those who first it the torch of civil discord. They knew that oivil war is ordinarily as much more dreadful than common war as common war is than peace. They who take to the sword must not complain if they fall by the same weapon; they whose feet are swif: 10 shed blood must not wonder if they, should one day stamble in their own.'

And, last comes the unkindest out of all-"Mr. Davis seems to imply," says the Times, "that, by ceasing to grow outton.

The Warline Activity.

[From the London Morning Post, Dec. 10th 1 In addition to the Persia, Australasian, Adriatio and Parana, six other screw transports were taken up on Tuesday, and will oe got ready with all speed to take tr. ops on board. The activity which now prevails at the several manufacturing dep and also in the department of the military storekeeper, at the Royal Arsenal as Wollwich, is nnexampled since the turiperiod in the Crimean war. In anticipa i a of the American difficulty terminating in a declaration of war, it has been resolved to have the most ample stores of every description at hand, in addition to the immense amount of warlike munitions now on passage or being shipped for Canada. Darie 2 Sunday, Monday and Tuesday no less ib n twenty-four wagons, laden with guns, howhave left the Arsenal, under escerts of Military Train Corps, for London, to be forwarded by railway to Liverpool and shipp: 1 for Canada, and additional stores will be

present week. Four new iron-clad first class steam frig ates are to be built with all peas b'a di patch. They are to be steam rams as well as eleam frigates. The beam or projecting stem under the water is to be twenty feet in advance of the stem. There fresh add into to the royal navy are to have thirty eix Armstrong 100 pounders on the gun deck, twenty-one on the spar deck, and two places hundred pound shot. They will be eighty eighteen inches broader. Their junnings will be 6815 tuns. The iron plated ship Resistance is being got ready for sea with all possible dispatch. The Stromboli, six, paddle, Commander Lord Elphinstone, was undocked as Portsmonth on Tuesday. See

I From the Landon Globe 11th Our regular forces a'ready in Canada ara errsotly set down at 5,000 men, and 2,200 more will, before the end of the week, be on their way. All these regiments have undergone some two or three years' training at one of the great camps of instruction. They are preficient in ride practice, and in every respect may be pronounced. It was not picked men. Of infantry of this class, an addition to the two regiments under orders, we have available for immediate service 27 bar alions (including three of the Guards), numbering in the aggregate 21,000 men; and, includ ing artillery and cavalry, we could at once oring into the field 30,000 men, whole condition would bear comparison with that of any army in Europe. In the matter of naval forces, we have at our command fleets such as the world never saw.

From the London Times, 12th. The Warrior is ordered to be supplied with eight of the Armstrong 100 pounders, which are to be substituted for eight of he 68-ponnders that are situated forward and aft, out of her line of armor plating. It is also intended to substitute the new pattern 70 pounder Armstrong as soon as possible for the ship's present complement of forty-pounder Armstrongs. The Black is being fitted ont as rapidly as possible in the steam basin of Portsmouth Dockyard. An immense deal of work remains to be done on board the chin before she can be at all thought of for the first clase reserve or commission.

[From the London Telegraph, 9th.] The Royal Arsenal Pier at Woolwich was thronged, on Saturday, when the Meibourne took her departure with a battery of Royal Artillery, and military stores, for North America. When the ship was fairly on her course "the spectators gave a hearty God speed,' which was immediately fellowed by waving of caps and handkerchiefs and shoute of applause. The shouts then com-menced on board, and were rapeatedly heard when the Melbonrne was far down the Thames, testifying in a perfectly unmistake. able manner to the feelings of the troops."

From the London Times, 10th. The Persia and Australian will, it is expected, be ready to sail hence for Canada about the 14th or 15th inst. Each of them ie to carry out a complement of 1 100 coldiere, 5,000 stand of arms, and 300 tuns of atores. Besides these, each is to take out a field battery and a large quantity of am-munition. In addition to the two vessels tions are on foot for securiog one or two other first class steamers.

Prom the London Daily News, 10th. We understand that the Grenadier Guards received orders on Friday night to hold themselves in readiness to embark immedi-ately for Canada. The three battalions will muster about 4,000 men.

From the London Post 12th The government has purchased for the use of the troops in Canada several thous-ands of leather waistoots, of the kind which proved so beneficial in the Grimon during the late war.

your soil will soon be driven across the Ohio.

BURDSVILLE, KY., Dec. 22, 1861. Editors Democrat-Gentlemen: I have the honor, as I conceive, to give publicity to one of the most brilliant exploits of the war. The circumstances are these: About the time of the organization of the "Home Guards" throughout Kentucky, Andy Garman, a resident of Marrowbone, distant about ten miles from here, assisted materia ally in raising several companies who afterwards volunteered, and are now station. ed at Columbia. For this he received many threats, and was Ill treated by the secessionists, so that he sought refuge in Coi. Hazzard's regiment. On last Sunday he received a message from home, stating that his entire family were very sick with the massles, and demanded his attention. He immediately left oamp in company with flyden Vanderbilt, of Wolford's Cavalry, and reached home about half past eleven o'olook at night. He had soaroely been welcomed by his sick family before his house was surrounded by twenty six rebel scoundrels, three of whom forced the door open, and demanded that they should sur-render. Garman and his friend swore they would die before being taken; wherenpor they fired upon the rebel cowards, who immediately left the house. Then a continnal fire was kept up for twenty minutes, the honse being literally riddled from their balls; seven penetrated the headboard of his wife's bed, who had the measles, and was also enceinte. The furniture is much defaced, and everything presents a wretched aspect. Garman kieled three rebels and wounded two. Many citizens saw them taking their dead back to Glasgow. Gar man's clothes were pleroed in four places, and he was shot through the hand. He and his comrade went back to Columbia the fillowing day, when Mrs. Garman died of

fright and disease.
Garman and Vanderbilt deserve the utmost praise for their noble conduct; and

Sewing Machine! Warranted the Best in the Market. ELIAS HOWE JR., & S. H. ROPER'S COMBINED PATENTS.

Straight-Line Movements, Original Transverse Shuttle, and Periphery Clamp Feed-Wieel. and Periphery Clamp Feed-Wheel.

The SE SEWING MACHINES COMBINE THE most recent improvements, are nearly noiseless when in operation, ma with the greatest case and rapidity, and ere better alapsed for general purposes and family use than any other. They are not liable to gut out of order, are exceedingly simple, and are made expressly for real practical utility; they do every variety of aswing, from the fine-t woven tissue to the heaviest woolen goods, both tailoring and fine leather work. Any person may learn to operate them in a very short time. time.
The great difficulty with all other old-style Mach

and result aimculty with all ether old-style Machines is soo much completation, requiring so much constant adjustment, and such at amount of mechanical still and ingenuity to use them to advantage, as to render them of little comparative value. But the Sewing Machines manufactured by Greenmen & True are not liable to these objections, as any person, on even a moment's examination, will readily discover. They will do more and better work than any other Machine ever offered to the public, pasking the must be satisful lock-stitch, althe on both sides. Send for an oit-hand specimen of sewing upon any material you wish, and you will then see hose it is done.

XXXVIIth Congress-First Session. Washington, Jan. 2 .- Senate-Mr. King presented a petition numerously signed by oitisens of New York city, praying for the emenoipation of siaves under the war

Mr. Latham presented a petition from the chamber of commerce of San Francisco for a steamship mail line between that port and

Mr. Sumner offered a resolution that the President be requested, if not incompatible with the public interest, to transmit to the Senate all the correspondence which has taken place since the Congress held at Paris in 1856, relating to neutral and belligerent rights on the ozean, which was agreed to. Mr. Kennedy presented a resolution from the State of Missouri, protesting against interference with slavery in the State by the General Government.

Mr Latham offered a resolution instruct. ing the committee on finance to inquire into the expediency of establishing a district bureau for the Treasury Department, to reg ulate and control the mints. Agreed to. Mr. Wilson offered a resolution instructing the Committee on Military Affairs to inquire into the necessity of medifying the act of July, 1861, increasing the military status of the United States. Agreed to. Also a substitute oalling on the Secretary of War to transmit to the Senate the num ber of cavalry regiments authorized to be raised, and where stationed, and whether it

would be advisable to convert those not yet mustered into the service into regiments of infantry. Agreed to.

Mr. Wilson introduced a bill to provide for the appointment of sutlers for the volunteer service of the army, and to define their duties. Referred. Mr. Grimes introduced a bill in regard to the administration of justice in the District of Columbia. Referred.

Mr. Merritt offered a resolution calling upon the Secretary of War for copies of the reports of the Surgeon-General and Sanitary Commission on the health of the army.

The Senate then adjourned till Monday. New York, Jan. 2 .- It is reported that Carl Sohurz has resigned the Spanish mission to take a command in the army. The workmen at the Navy Yard, numbering nearly 3,000, have struck, in cense quence of a recent order of the Secretary of

Washington, Jan. 2 -Steamer Stepping Stone came up from the flotilla last night. This steamer, on her reconnoitering trip up Occoquan bay lately, seattered the rebels with three well directed chots from her 24 punder riffed gun, the shells bursting right in the midst of the rebel soldiers; but on her return she was followed by riflemen, who, once lei behind tress, fir d several bullets through her sides. One of the shells passed through the captain's berth. The new rebel battery is on Possum Nose, this side of Cook Pit Point, and is therefore the nearest battery to the city. At least one heavy rifled gan is planted there, as shells have

been fired into the mouth of Mattawamaman creek. Gen. Benham has been released from arrest, and is ordered to report himself for duty at once. The Court of Inquiry ignored the charges against hlm as soon as they were received. Col. Wilson's Regiment of Mechanio Fusiliers has been ordered to report to Gen Lane at Fort Leavenworth. The line officers will be selected from the State from which each osmpany halls.

NEW YORK, Jan. 2 .- We learn from the Havana Diarie that the Governor of Vera Cruz was willing to evacuate the city, but demanded and received a respite of 24 hours. Gen. Garetta, on landing, issued a proola-mation to the troops and another to the people, the latter to the effect that the troops had some thither only to demand satisfaction for the failure of treaties and violence committed against their compairlots and to obtain a guarantee against similar ourrages. The great satisfaction of the army, after fulfilling its mission from the government, would be to return to its own. country with the cortainty of having merited the affections of the Mexicans. Nearly 100 rifled cannon of the latest pattern were found at San Juan.

SAN FRANCISCO, CAL, Jan. 2 -Stormy weather has interrupted telegraph commu-nication with the States and over the Sierra Nevada, since the 24th uit. Floods were renewed to a great extent throughout the valley portions of the State. Sacraments and Stockton were again partially overflowed, without much additional damage. Business with the interior is suspended. More property has been destroyed by these freshets than by all the freshets heretoforesince the country has been settled by Americans. Weather pleasant to-day.

COMMISSION & FORWARDING MERCHANT,

We find the following Items in the Provost Guard, a new paper published at Paduosh:

AN UNPUBLISHED FAOT -A gentleman in this city, who was present at New Madrid last Angust, tells the following: It will be remembered that one of the Confederate gunboats came up to Columbus and captured gundon's came up to columbus and captured the little steamer Equality. At that time Gen. Pillow was in command at New Madrid, under Gen. Polk. The latter had just paid a visit to New Madrid when the capture of the Equality occurred. As the Confederate gunboat retreated down the Mississippi with her prize, she was followed by the United States gunboats Lexington and A O. Tylez. A sharp cannonading took place to within a few miles of New Mairid. Gen Polk hearing the cannonading, in his fear, imagined that the United States forces were coming Orleans bar.

The steamer Corrette Richmond arrived

Gen. Pillow to fall back npon Randolph, himself retreated on board the steamer Wm. M. Morrison and LEFT FOR MEMPHIS! A: that time the Morrisan and Ohio Balla were all the steamers at New Madrid, and the cowardice of the act was in taking the largest and swiftest boat for himself and staff, and leaving but the Ohio Belle to transport seven thousand troops to Ran-

Boston, Jan. 2.—About 3,000 men of Butier's division embarked to day, and will leaving the others apparently at the mercy of the United States forces.

The gentleman informs us that curses loud and deep were showered upon the head of the preacher General, and that hundreds of them swore they never would fight under such a capting coward ?

-Clay King, a sort of an itinerant vagabond, who styles himself "Mejor H O. uip to Paducah. Massoic Gem from Kentucky river, King, C. S A.." is reported to be at Mayfield with a 300 mer. He has, we understand, about that many deluded followers, but we hardly credit the numer of his presence at Mayfield. If he is, General Smith could not afford a greater pleasure to his many Union friends in this section than by sending the necessary force to capture him. One section of oavalry would be quite sufficient.

They have, at their own urgent solicitations, received nothing but aintly offices both from our Government and people. They have prospered by their commercial intercourse with us for the past twenty years to a degree unparalished in their hletory. They have invited our commerce through their canals, and over their railroads, to their own advantage and our detriment, and they have been patrouized and paid for it. They have asked of us figurecial assistance in constructing those works, and they have received it. In fact, the only public works of Upper Canada which have not made the colonial treasury bankrupt are those through and over which American traffic and passengers pass Under a false and plausible pretext they sought a treciproclty" in the interchange of commodities, and when they had secured it at the expense of our credulity and confidence in their faith, by a change in their tariff laws they traitorously clutched the advantage to themselves and left the dissayan age with us, and, like a jockey in a bargan; ever since have bragged of overreaching us. They have asked the unrestricted transit of their foreign exports and imports over our canais and railroads, and obtained and enjoyed it. In short, we have treated the Canadas to advantages utterly incompatible with our own interests, only to be shubbed and insulted in our time of domestic trial.

MARKETS BY TELEGRAPH. great was the indignation among the mem-bers of the company to which Schultey beionged at the seeming careleseness of the Major, who should have had picket guards thrown out along the lines of fire, that the company procured a rope, and after selacting a tree on which to execute the Mejor by hanging, they went to his quarters in search of him. The Major, however, left the camp and has not since been seen.
Col Barret appealed to the troops to return to their quarters, promising the Major's conduct should be inquired into, and if the accident was caused through carelestness on the part of the Major, he should be severely punished.—Cin. Enquirer, Jan 1st.

CHRISTMAS AT THE BRITISH LEGATION IN Washisoron.—Lord Lyons had not, on Wednesday, received the official tidings of the death of Prince A bert, which will make it obligatory on him and his bousehold to go into monraing. So the usual Obristmas dinner come off, and the nine persons reoognized as of the Brilish Legation, with the secretaries, clerks, bearer of dispate as, and a few loyal Britons were present, making about thirty in all. Among the guests were Authory Trollope, the novelist; Dr. Russell, of the London Times, and Mr. Vizitelly, the artist of the London Illustrated News. The dianer comprised old English cheer and modern French cooking, served by the domestics of the Legalion in livery .- Phil. Inq.

ENGLISH NEWSPAPER STATISTICS .- It appears that there are now upwards of 1,100 newspapers published la Great Britain. About two centuries sgothere was only one newspaper in the whole of Britain. It was small weekly, edited by Nathanlal Butler, and had an extremely limited circulation. Within two centuries, therefore, the number of newspapers had multiplied by 1,100, while the circulation appears to have multiplied about 500,000 times—the last circula-tion having rendered it prabable that the newspapers and class journals in Great Britain have the enormons aggregate lasus of 222,000,000 a year.

The Intrigues in the British Cabinet. PALMERSTON WANTS W. 1 -HE IS HELD BACK

The London correspondent of the New York Tribune, of the date of the 7th of December, eays:

Of one thing you may be sure, Palmerston wents a legal pretext for a war with the United States, but meets in the Cabinet BRAVE MEN councils with a most determined opposition on the part of Mesers. Gladetone and Milner Gibson, and, to a less degree, of Sir Cernwall Lewis "The noble Viscount" is backed by Russell, an abject tool in his hands, and the whole Whig Coterie If the Washington Cabinet should furnish the desired pretext, the present Cabinet will desired protext, the present Cabinet will be sprung, to be supplanted by a Tory Administration. The preliminary steps for such a change of scenery have been already settled between Palmerston and Disraeli Hence the furious war cry of the Morning Herald and the Standard, those bungry long missed crumbs from the public alm

Palmerston's designs may be shown up by calling into memory a few facts. It was he who insisted upon the proclamation, acknowledging the secessionis as belligerents, on the morning of the 14th of May, after he had been informed by telegraph from Liverpool that Mr. Adams would arrive at London on the night of the 13th May. He, after a severe struggle with his colleagues, dispatched three thousand men to Canada, an army ridiculous, if intended to cover a frontier of 1,500 miles, but a clever sleight-of-hand if the rebellion was to be cheered and the Union to be irritated. He, many weeks ago, urged Bonaparte to propose a joint armed intervention "in the internecine struggle," supported that project in the Cabinet council, and failed only in carrying it by the resistance of his colleagues. He and Bonaparte then resorted to the Mexican intervention as a pis aller. That operation served two purposes, by provoking just resentment on the part of the Americans, and by simultaneously furnishing a pretext for the dispatch of a squadron, ready, as the Morning Post has

the anti-slavery North and the anti-slavery force of England and France. And what eays the very same Morning Post, this curious compound of Jenkins and Rhodomonte, of plush and swash, in its to-day's issue, on occasion of Jefferson Davis' address? Hearken to the Palmersten or-

acle:
"We must look to this intervention as one that may be inoperative during a considerable period of time; and while the Northern government is too distant to admit of its attitude entering materially into this question, the Southern Confederation, on the other hand, stretches for a great dis- DEALER AND IMPORTER IN tance along the frontier of Mexico, so as to render its friendly disposition to the authors of the insurrection of no elight cen-

The Northern government has invariably railed at our neutrality, but the Southern, with statesmanship and moderation, has recognized in it all that we could do for either party; and whether with a view to our transactions with Mexico, or to our relations with the Cabinet at Washington, the friendly forbearance of the Southern Confederacy is an important point in our

MEDICAL

Scrofula, or King's Evil IS A CONSTITUTIONAL DISEASE, A CORRUPTION of the blood, by which this fluid becomes viitated, weak and poor. Being in the circulation, it pervades the whole body, and may hurst ont in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scroful ns talat if variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, flith, and flithy habits, the depressing vices, a di, above all, by the venereal injection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to ebildren unto the third and 'owrth generation." Indeed, it seems to be the rod of Him who says, "I will visit the injusties of the father upon their children."

Its effects commence he deposition from the blood of corrupt or ulcerons matter, which, in the lange, liver, and internal organs, is termed tubercles; in the glaoda, awellings; and on the sur ace, cruptions or sores. This find corruption, which genders in the blood, decreases the energies of ill e, so t" at a crofulous constitutions not only suffer from scrofulous complaints, but they have far loss power to withstand the attacks of other diseases; concequently vast numbers perish by disorders which, although not scroulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decumates the homan family has its orken differently in this scroulous constitutions and

and, indeed, or at the organs, also note, or are assistantly varied by the same caose.

One quarter of a lear people are acrofulous; their peoples are are invasted by this lurking infection, and their health is undernined by it. To cleanse it from the system we must renovate the blood by an attentive medicine, and luvigorate it by healthy tood and exercise. AYER'S COMPOUND near dif Sup's L. a. F. and L. S. F. E. R. EXTRACT OF SARSAPARILLA

The most effectual remedy which the medical skill our times can devise for this everywhere prevailing fatal malady. It is a mbined from the most actented is that have been discovered for the expurgation of this foul disorder from the blood, and the resent he system from the destructive consequences. He the system from its destructive consequences. Hence it atonid be employed for the cure not only of Serofita, but also those other affections which wise from it, such as ERUPILVE and SKIN DISEASE, STANYED-NYS FIRE ROSE OF ERYSIPELAS, FIMPLES, PUSTULES, BLOTCHES, RLAINS and BOLS, TUMORS, TWITEKI AND SALD HEAD, KING-WORE, RHEUMATISM, SYSH LITTO SEE MERCURIAL DISEASES, DRUPY, DVSEPSIA, DEBILITY, and, indeed, all COMPLAINTS ARISING FROM VICTATED OR IMPURE BLAD. The popular belie in "impurity of the blood" is founded in trate, to serof has is a degeneration of the bloot. The particular purpose and victure of this Sarsavailla is, to purify and regenerate this vital ind, without which, secund health is impossible in contaminated constitutions.

Ayer's Ague Cure

FOR THE SPEEDY CURE OF INTERMITTENT FEVER OR FEVER AND AGUE, BEMITTENT FEVER, CHILL FEVER, DUMB AGUE, PERIODICAL HEADACHE OR BILIOUS HEADACHE, AND BILIOUS FEVERS-INDEED. FOR THE WHOLE CLASS OF DISEASES ORIGI-KATING IN BILIABY DERANGEMENT, CAUSED BY THE MALARIA OF MIASMATIC COUNTRIES.

WE ARE ENABLED HERE TO OFFER THE COMmunity a remedy which, while it circuit the above
complaints with certainty, is still perfectly harmics in,
any quantity. Such a remedy is invaluate in districts
where these afflicting disorders prevail. This "Cura"
expels the missmatic poison of FEVER and AGUE
from the wystem, and prevents the development of the
disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy everyet discovered for this class of complaints, that also the
cheapest. The large quantity we supply for a dollar
hrings it within the reach of everybod; and in billous
districts, where Fever and Ague prevails, everybody
should have it and use it neely both for cure and profection. It is hoped this price will place it within the
reach of all—the poor as well as the rich. A great enperiority of this remedy over any other ever discovered
for the appendy and certain sure of intermittents is that
it contains to quinitie or mineral; consequency, it pro
duces no quinism or other injurious effects whatever
upon the constitution. Those cured by it are left as
healthy as if they had never had the disease.

Fever and Ague is not alone the consequence of the
missmatic poison. A great variety of disorders arise
from its irritation, among which are—
Nerraigia, Rheumatium, Gout, Illeadache, Blindness,
Pain in the Bowels, Colic, Paralysis,
and Derangement of the
stonact.

All of which, when originating in this cause, put un the
intermittent type, or become periodical. This "Cura"
expels the pison from the blood, and, consequently reading in the mislations districts. If taken occasionally or
daily while exposed to the infection, that will be excreted trum the eyestem, and cannot accumilate in
anticlent quartity to diper into disease. Hence it is
even more valuable for protection thas remedy anoty. BY THE MALARIA OF MIASMATIC COUNTRIES.
